GEOGRAPHY OF STONE

The Rock™, l'universo della ceramica ad effetto pietra, di grande impatto e solidità. Tredici differenti versioni, originali, di tendenza, trasversali nell'utilizzo e nella destinazione, sempre attinenti al mercato, per soddisfare ogni esigenza worldwide.

The Rock™ is a universe of eye-catching, sturdy stone-effect ceramics. Thirteen different original, trending versions which are transversal in use and destination, always relevant to the market, to satisfy demand worldwide.

RINNOVATI SPUNTI CREATIVI

Nuove coordinate territoriali e stilistiche, produttive e innovative, hanno interagito tra loro per conferire in una sola espressione, The Rock™, una grande varietà di soluzioni dove la natura e la sua morfologia rimangono sempre il punto di partenza per la ricerca.

Renewed creative cues.

New territorial and stylistic, productive and innovative coordinates have interacted with one another to present The Rock™ in a single expression, a wide variety of solutions where nature and its morphology always represent the starting point in the search.

BRECCIA IMPERIALE

Un omaggio alla Breccia Imperiale, pietra originaria del Sudamerica che restituisce visivamente la forza dei movimenti tellurici da cui prende forma. Per effetto di essi, il fondo dai toni marroni, caldi e avvolgenti, è mosso da una ragnatela di venature bianche, di dimensioni molto variabili, e sfumature dal caffè al castano, all'apparenza omogenee, ma a un occhio più attento composte da granulazioni di intensità differenti. Il risultato è una materia dal look dinamico e complesso, ideale per trasmettere una pronunciata raffinatezza naturale agli spazi contemporanei.

BRECCIA IMPERIALE

This tribute to Imperial Breccia, a native South American marble, recreates all the force of the tectonic movements that give the original stone its form. Thanks to them, the background of warm, enveloping brown tones is moved by a web of white veins, that vary in size and colour from coffee to brown, and which at first seem homogeneous, but on closer inspection consist of granulations of different intensities. The result is a material with a dynamic, complex appearance that offers contemporary spaces a clear but natural sense of sophistication.

NEGRESCO

Un omaggio a una quarzite di provenienza sudamericana dalla struttura granulosa e cristallina estremamente robusta, frutto di lenti processi di raffreddamento del magma. The Rock™ la ripropone nel suo colore originario, tra il grigio scuro e il nero intenso, esaltando il reticolo di venature bianche, dalle dimensioni molto variabili, che spesso hanno portato a identificarla come una varietà di marmo.

NEGRESCO

This is a tribute to a quartzite found in South America with an extremely robust granular and crystalline structure, caused by the slow process of cooling magma. The Rock™ recreates it in its original colour, between dark grey and intense black, enhancing its network of white veins that vary in size, and which have often led to it being seen as a variety of marble.

NEGRES6 278 RM , NEGRES6 120 RM , STA VP6 278 LP

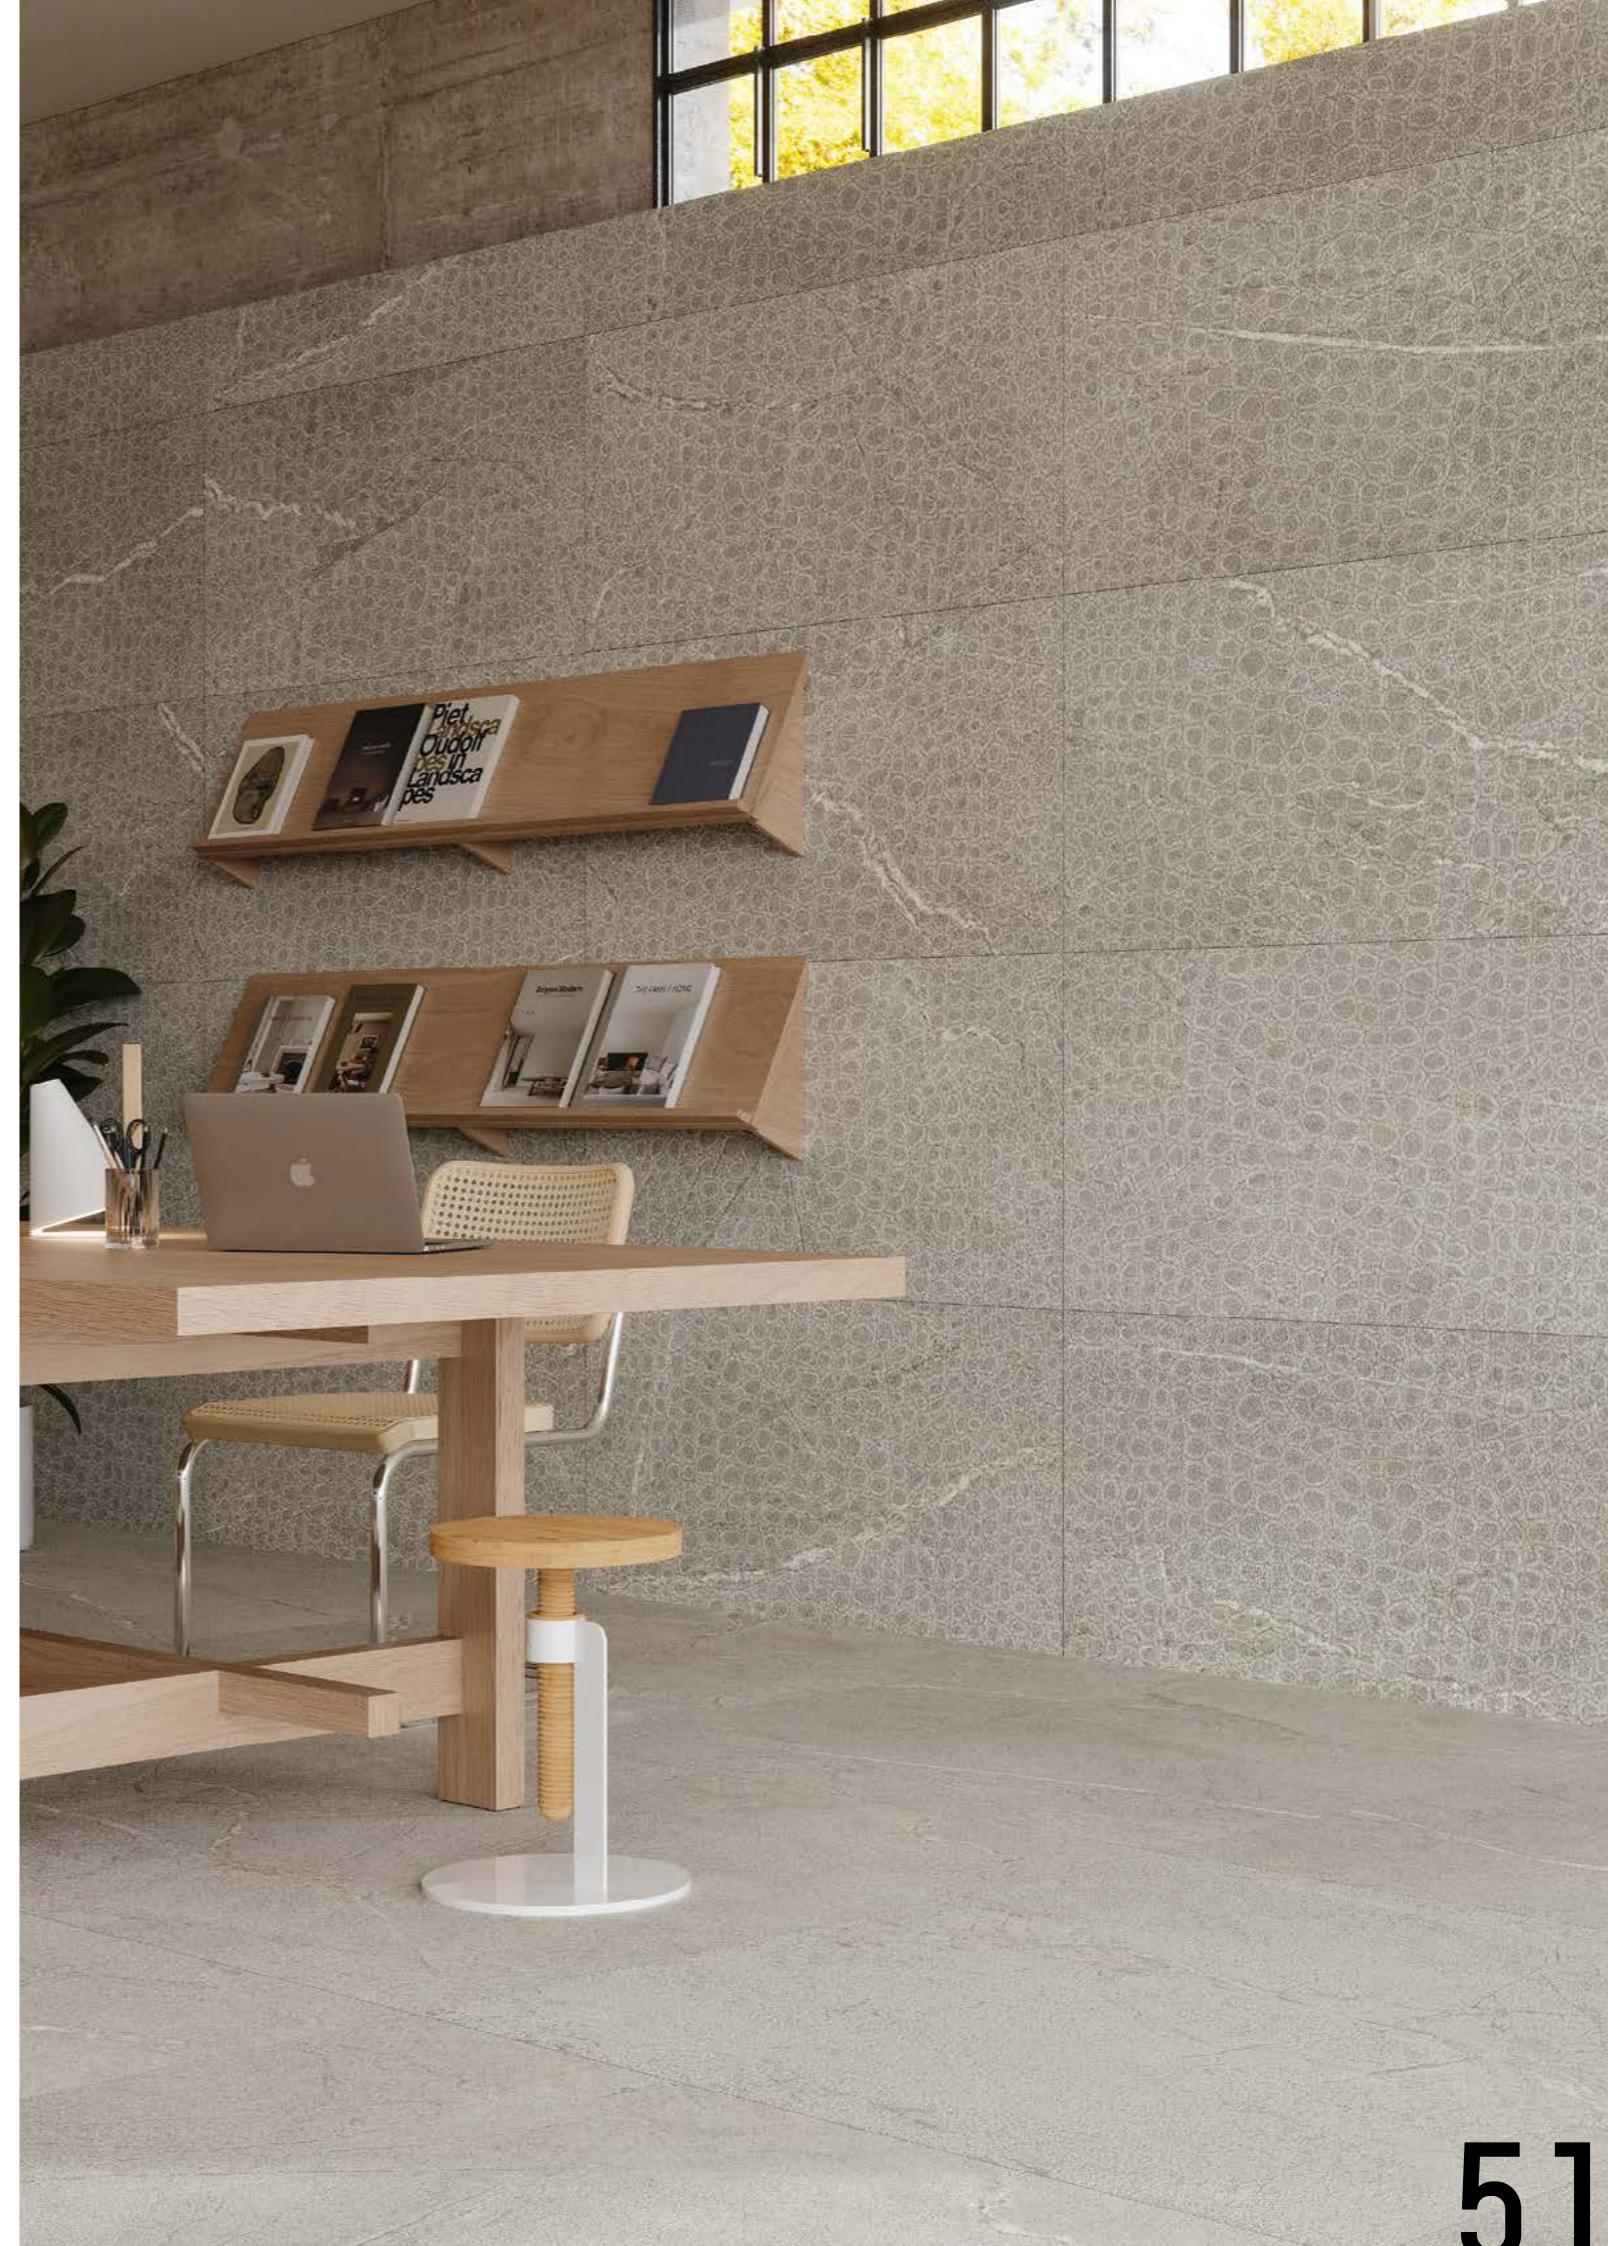

SOAPSTONE

Con Soapstone, la bellezza dell'omonima pietra, conosciuta anche come pietra ollare o pietra saponaria, arriva finalmente negli spazi di design. Composta principalmente da talco, magnesite e clorite, la roccia soapstone si caratterizza per una consistenza morbida e oleosa al tatto che la rende molto duttile ma, per la particolare tenerezza, adatta per lo più a realizzare oggetti ornamentali e sculture. Nella proposta di The Rock™, le sue tonalità, che in natura possono spaziare dal verde, al crema, al grigio, assumono sfumature morbide e calde di quest'ultima gradazione, prestandosi alla realizzazione di ambientazioni dall'eleganza spontanea e confortevole.

SOAPSTONE

With Soapstone, the beauty of this stone, also known as steatite or soaprock, finally enters the world of design. Composed mainly of talc, magnesite and chlorite, soapstone rock is characterised by a smooth, oily texture that makes it highly pliable and, thanks to its unique softness, ideal for making ornamental items and sculptures. In The Rock™ proposal, this stone's colours, which in nature range from green to cream and grey, take on soft, warm shades of the latter, that are perfect for creating comfortable and spontaneously elegant environments.

SOAPST6 278 RM . SOAPST6 120 RM

DORSET

La pietra che prende il nome della regione inglese di provenienza, e che nel corso dei secoli ha reso assolutamente unici i suoi paesaggi, torna protagonista in una variante ceramica che rilegge la sua anima rustica con un rinnovato esprit di design. Tra le differenti tonalità reperibili in natura, dal beige, al marrone, al grigio, Dorset privilegia una modulazione grigio calda, perfetta per valorizzare le sue inconfondibili grafiche minerali, frutto di milenari processi di sedimentazione dei fossili. Il risultato è una materia dal volto tanto autentico quanto raffinato, ideale per progetti che puntano su una ricercata sensibilità contemporanea per dare nuova forza espressiva al carattere della pietra.

DORSET

This stone, named after the English county that is its home, and whose landscapes it has rendered unique over the centuries, now returns to its starring role in a ceramic variant that reinterprets its rustic soul with a new design esprit. Among the different shades found in nature, from beige to brown to grey, Dorset favours a warm grey modulation that is perfect for enhancing its unmistakable mineral patterns created by millennia-old processes of fossil sedimentation. The result is a material with a surface as authentic as it is refined. The ideal choice for projects with a refined contemporary sensibility that seek to give new expressive force to the stone's character.

DORSET6 278 RM , DORSET6 120 RM

PIASENTINA

La roccia sedimentaria del Friuli — pietra che la piase, o che piace nella traduzione italiana — torna in una variante che rielabora il suo DNA rustico in chiave elegante. Il suo colore grigio caldo, animato da esili venature bianche e fitte punteggiature di colore tendenti al bruno, si esalta in una rilettura in perfetto stile The Rock™, trovando una nuova sintesi tra look naturale e proiezione progettuale. Il mix ideale per personalizzare i propri spazi con texture che raccontino del cuore antico della roccia attraverso un linguaggio di design esclusivo e di tendenza.

PIASENTINA

The name of this sedimentary rock native to the Friuli region in Italy, literally means the stone that gives pleasure. And it does just that in this variant that restyles its rustic DNA into refined elegance. Its warm grey colour, enlivened by slender white veining and dense colour highlights tending toward brown, is enhanced in this perfect The Rock™ style reinterpretation that creates a new synthesis of a natural look and refined design style. An ideal mix for personalizing spaces with textures that tell the story of the rock's ancient heart through an exclusive and on-trend design language.

PIASEN6 278 RM . PIASEN6 120 RM . PIASEN 90 AS RM . PIASEN L 90 AS

ARDESIA

Ardesia reinterpreta l'omonima roccia sedimentaria che per la proverbiale fissilità, vale a dire la facilità con cui può essere sezionata in lastre, è stata da sempre tra i materiali lapidei più utilizzati in architettura, ad esempio per la realizzazione dei tetti, così come in altri ambiti, tra cui la produzione delle lavagne. La variante di The Rock™ si distingue per una tonalità particolarmente calda e luminosa, sulla quale le sfumature della pietra – a volte particolarmente accentuate, delle altre appena accennate danno vita ad armonici disegni. Il risultato è un aspetto in ispirato equilibrio tra dinamismo grafico e sobria eleganza naturale.

ARDESIA

Ardesia reinterprets the sedimentary rock known in English as slate. Due to its proverbial fissility, i.e., the ease with which it can be split into slabs, slate has always been one of the most widely used stone materials in architecture, for example in constructing roofs, as well in other areas, like the production of blackboards. This variant of The Rock™ is distinguished by a particularly warm and luminous tone, on which the stone's various shades – sometimes bold and sometimes delicate – give rise to harmonious patterns. The result is an inspired balance between graphic dynamism and understated natural elegance.

ARDESI 278 RM . ARDESI 120 RM . ARDESI 90 AS RM

MACAUBAS

La regina delle quarziti, così conosciuta per la qualità di abbinare la compattezza tipica delle rocce metamorfiche a un look che la avvicina al mondo dei marmi, trova una nuova declinazione tecnologica in The Rock™. La proposta cattura lo sguardo per l'intreccio di fasce di colore grigio-argento e grigio-blu con venature bianche e dorate, dalle intensità e dimensioni molto differenti, su un fondo dai variegati toni di beige. Da questo incrocio nasce una perfetta sintesi tra sobrietà e dinamismo, applicabile indoor e outdoor per dar vita ad ambientazioni contemporanee che restituiscano il carattere autentico della pietra con un suggestivo accento esotico.

MACAUBAS

This queen of quartzites, particularly well known for its unique combination of the compactness typical of metamorphic rocks and a look that is similar to the world of marble, finds a new technological identity in The Rock™. This proposal catches the eye for its complex weave of silver-grey and blue-grey bands, white and gold veining of very different intensities and sizes, and a background of variegated beige tones. This delicate interplay creates a perfect synthesis of sobriety and dynamism that can be used indoors and outdoors to give life to contemporary settings that invoke the authentic character of stone with a striking exotic accent.

MACAU6 278 RM . MACAU6 120 RM

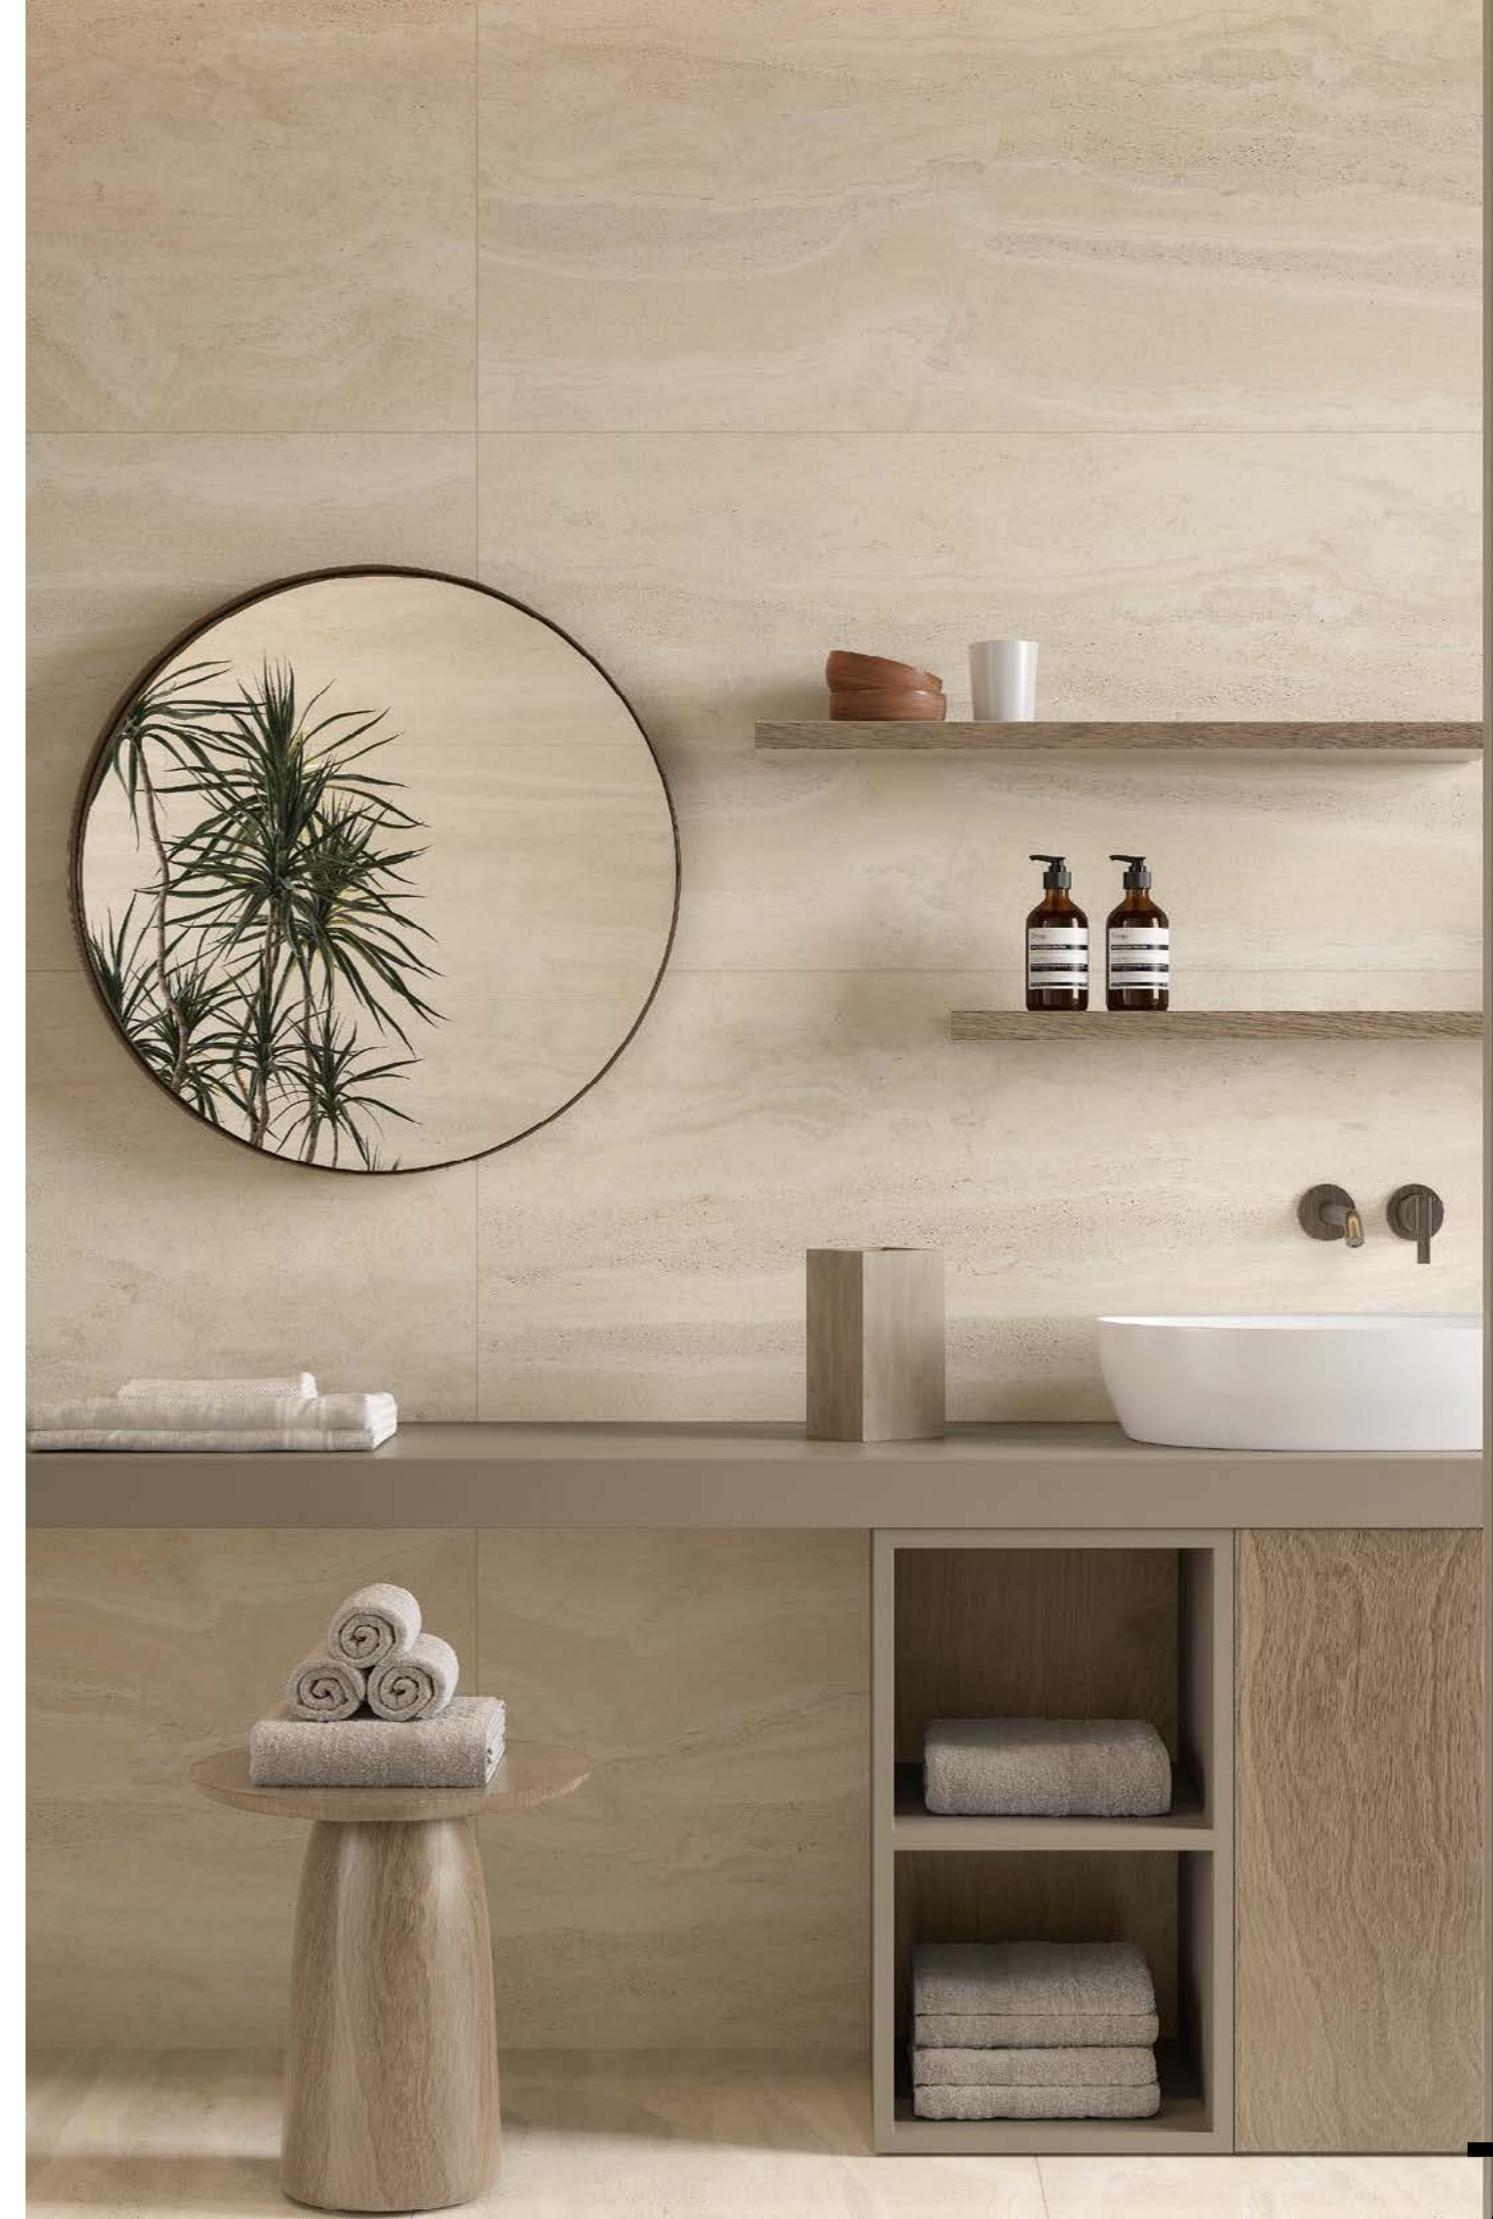

TRAVERTINO ARGENTUM

Travertino Argentum attualizza la bellezza del Travertino Silver, variante che si presenta in natura con un colore grigio-argento particolarmente moderno. Nella proposta di The Rock™, questa inflessione cromatica dà grande risalto al susseguirsi delle venature e nuvolature che da sempre decretano il fascino della materia ispirativa. L'effetto di insieme è un'alchimia di nuance calde e delicate, perfetta per dar vita a molteplici stili. Tutti all'insegna di un comfort contemporaneo eppure fuori dal tempo: in piena coerenza con l'intramontabile allure del travertino.

TRAVERTINO ARGENTUM

Travertino Argentum is a highly contemporary interpretation of the beauty of Travertino Silver, a Travertine marble with a naturally modern silver-grey hue. In The Rock™'s proposal, this chromatic modulation highlights the alternation of veining with veils of colour that has always enhanced the charm of this inspirational stone. The overall effect is alchemy of warm and delicate nuances that is perfect for bringing multiple styles to life. All this in the name of a contemporary yet timeless comfort that is totally consistent with the immortal allure of travertine.

TRARGE 90 AS RM

BORGOGNA VENATA

Un tributo alla Pietra di Borgogna Venata, variante di Limestone ampiamente applicata in architettura, con un impatto pittoresco e inconfondibile sui paesaggi urbani di Digione e altri borghi dell'omonima regione francese. La rilettura di The Rock™ ne esalta le fattezze, restituendo sulla superficie la fitta e irregolare trama di delicate venature e nuance disegnata dai lenti processi di stratificazione calcarea. L'effetto finale è una materia suadente, dalle calde tonalità in equilibrio tra il grigio e il beige, ideali per realizzare ambientazioni eleganti e confortevoli.

BORGOGNA VENATA

This is a tribute to Veined Burgundy Stone, a limestone variant widely used in architecture, particularly in the urban landscapes of Dijon and other villages in this French region, where its unique, picturesque impact is unmistakable. The Rock™'s reinterpretation of this stone enhances its features, restoring to the surface the dense and irregular pattern of delicate veins and nuances sketched by the slow processes of limestone stratification. The final effect is a seductive material with balanced warm tones between grey and beige, that is ideal for creating elegant, comfortable environments.
